

# **PWR72**

## **Features**

The PWR72 is an unregulated power supply for use with stepper motor and servo motor drivers. The driver must be capable of 80 volt operation. Some compatible drivers include MicroKinetics' DR8010™ and DM8010™ as well as PACSCI's 6410 model.

- AC input voltage 115 VAC
- Fused DC output

## **Electrical Specifications**

Input voltage ..... 115 volts

Current consumption ..... 6 amps at 115 volts

Voltage outputs ..... 72 volts unregulated at 10 Amps

Physical dimensions ..... 9.0" w X 5.0" d X 4.75" h

Working temperature range .... (32°F ~ 122° F (0° C ~ 50° C)

## **Wiring Connections**
